

# *Asclepias syriaca*

## Common Milkweed

Common roadside plant, but worthy of inclusion in the garden. (Be aware, though, that it will spread.) Grey-green foliage, creamy-pink, fragrant flowers borne in large, rounded clusters. Seedpods are attractive all winter. Attracts butterflies, and, with the other milkweeds, is the host plant for Monarch Butterfly caterpillars.

***Suggested companions:*** little blue stem (*Schizachyrium scoparium*), culver's root (*Veronicastrum virginicum*), goldenrods (*Solidago* sp.), asters (*Aster* sp.), Indian grass (*Sorghastrum nutans*)
